PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience deploying and managing containerized workloads on **Kubernetes (AWS EKS)** and **Docker**, building automated CI/CD pipelines with **Jenkins** and **GitHub Actions**, and provisioning secure AWS cloud infrastructure with **Terraform**. Comfortable owning the full pipeline from Infrastructure-as-Code and Helm-based deployments through monitoring and DevSecOps scanning, with measurable results: **40% faster deployments**, **45% smaller production images**, and **99.9% server uptime** through disciplined automation.

TECHNICAL SKILLS

Containers & Orchestration:	Kubernetes, Helm, Docker, Docker Compose, AWS EKS, Artifact Management
CI/CD & Automation:	Jenkins, Jenkinsfile, GitHub Actions, Terraform (IaC), CloudFormation, Ansible
Cloud (AWS):	EC2, S3, VPC, IAM, CloudWatch, Route 53, NAT Gateway
DevSecOps & Security:	OWASP ZAP (DAST), SQLMap (SAST), Dependency & Secret Scanning
Monitoring & Logging:	Grafana, Prometheus, AWS CloudWatch, AlertManager
OS & Networking:	Linux (Ubuntu/CentOS), Bash Scripting, SSH, TCP/IP, DNS, UFW, IPTables
Other Tools & DB:	Git, GitFlow, Nginx, Gunicorn, MySQL, MongoDB, REST APIs

WORK EXPERIENCE

DevOps & Cloud Engineer — Freelance / Contract

Jan 2023 – Present

Self-Employed | Lahore, Pakistan

- Containerized microservices with Docker multi-stage builds and deployed on Kubernetes (AWS EKS) with Helm charts, cutting production image sizes by 45% and managing rolling updates and autoscaling.
- Built CI/CD pipelines (Jenkins, GitHub Actions) with caching strategies — reduced release cycle time by 40%, saving 8+ engineering hours/week.
- Provisioned AWS infrastructure (EC2, VPC, IAM, S3, EKS) using Terraform IaC for repeatable, version-controlled environment creation.
- Integrated OWASP ZAP & SQLMap DAST/SAST scans into CI/CD pipelines — reduced manual security audit time by 60%.

DevOps Intern — DaFi Labs / EmpRadar.ai / EmraSkills

Jul 2026 – Aug 2026

Remote Program

- Completed an intensive DevOps Internship Program, gaining hands-on exposure to cloud deployment practices with AWS EC2, AWS Amplify, and Vercel.
- Deployed and secured applications on Linux servers using Nginx, PM2, and SSL/TLS via Certbot, with Git/GitHub-based and AI-assisted deployment workflows.

DevOps Intern — Nishat Mills Limited (Dyeing & Finishing Plant)

Jul 2026 – Aug 2026

On-site | Lahore, Pakistan

- Supported enterprise IT infrastructure, Linux system administration, and deployment operations within a live industrial manufacturing plant.

Cloud Infrastructure Intern — Academic Project Work

Aug 2023 – Dec 2023

University of Lahore | Lahore, Pakistan

- Architected secure multi-tier AWS VPC with public/private subnets, NAT Gateway, and ACLs per AWS Well-Architected Framework.
- Applied Principle of Least Privilege using custom IAM roles, MFA enforcement, and permission boundaries across all resources.

KEY PROJECTS

Microservices & Containerized React App Orchestration | Docker, K8s, AWS EKS, Helm, Nginx

- Re-architected monolithic React.js app into containerized microservices using multi-stage Dockerfiles — image size reduced by 45%.

- Managed autoscaling, rolling updates, and service discovery on AWS EKS with Helm charts; Nginx improved caching performance by 30%.

CI/CD Pipeline Automation with Terraform IaC | *Jenkins, GitHub Actions, Terraform, AWS EC2, Docker*

- Engineered robust CI/CD pipelines with Jenkinsfiles and GitHub Actions YAML with intelligent caching — decreased deployment cycle times by 40%.
- Provisioned AWS staging environments with Terraform IaC; secured credentials via Jenkins Credentials Manager and GitHub Secrets.

AI-Based DevSecOps Vulnerability Scanner | *GitHub Actions, OWASP ZAP, SQLMap, Docker, AWS, Gemini AI*

- Built a cloud-based vulnerability scanner triggered on Git commits, integrating DAST (OWASP ZAP) & SAST (SQLMap) in Docker containers.
- Integrated Google Gemini AI to auto-classify vulnerability logs and generate actionable remediation reports, saving 15+ weekly triage hours.

EDUCATION & CERTIFICATIONS

BS Information Engineering Technology

University of Lahore (UOL) | 2023 – 2027 (Expected)

Languages: Urdu (Native), English (Professional)

Soft Skills: Problem Solving, Attention to Detail, Fast Learner, Team Collaboration

- **Docker & Kubernetes** (2024)
- **GitHub Actions & CI/CD** (2024)
- **Linux System Administration** (2023)
- **AWS Cloud Practitioner** (In Progress)
